

TECHNICAL SHEET

NEWS

NEWS

NEWS is a chair conceived and designed for use in public offices, workplaces, schools and conference rooms.

Produced in compliance with the ISO 9001 company quality management system.

Tested with laboratory tests by the largest Italian research and testing institute in the wood-furniture sector according to the American standard ANSI / BIFMA X5.1: General Purpose Office Chairs, regarding safety requirements and mechanical resistance test methods.

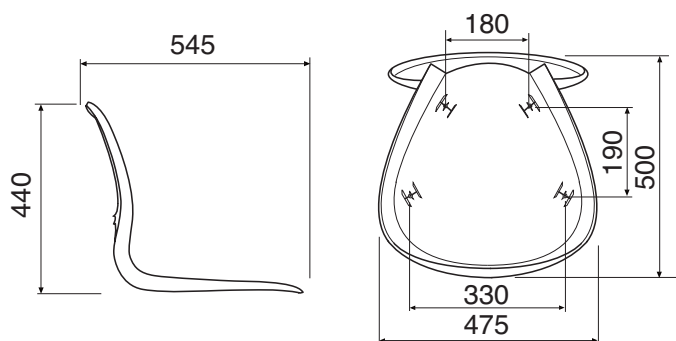

Tested to
ANSI-BIFMA
X5.1-2001/16

The logo for 'plastica seconda vita MIX ECO'. It features a stylized blue and green circular graphic to the left of the text. The word 'plastica' is in green, 'seconda vita' is in a smaller green font, and 'MIX ECO' is in blue.

The shell is printed with Gas-Moulding technology using first choice colored copolymer polypropylene, with superior chemical and mechanical performance, 100% recyclable, non-toxic and fire retardant, fire reaction class 1 (Italian legislation).

The particular molding technique allows the creation of articles with high thicknesses but empty inside, giving them lightness, greater resistance and durability.

OVERALL DIMENSIONS

height 870 mm

width 520 mm

depth 520 mm

SHELL DIMENSIONS

height 440 mm

width 475 mm

depth 500 mm

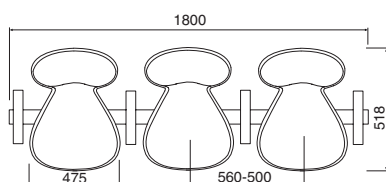

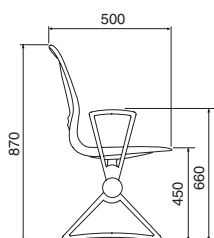

The perimeter of the plastic shell has a thickness ranging from 12 mm up to almost 40 mm in the area where seat and backrest meet, which is the most stressed part.

It has a hole with rounded edges between the backrest and the seat that facilitates the grip, making it easier to handle. The surface finish is non-slip and has no ribs, the edges are rounded.

Padded panels with fabric or simil leather covering can be applied to the seat and back.

The NEWS shell can be fixed in 4 points by self-tapping screws on the classic 4-legged frame, made with round tube diam. 18 mm, or on a 5-star swivel base with castors and gas lift for height adjustment; it can also become a certified 3.0 single-seater desk, meeting the most modern teaching requirements, with writing tablet and large circular base for storing bags or backpacks, the swivel base with 6 castors provides an easy 360° rotation enabling the students to switch from a frontal lesson to a group work; or a modular beam, with the possibility of adding armrests and coffee table.
