DESCRIZIONE TECNICA

LEOSLIM

Versatile and compact design

LEOSLIM is one of the few VIP seats on the market with a depth of only 60 cm, it has been designed taking into consideration the requirements of maximum functionality and comfort.

Its main feature is its feasibility as it fits perfectly in those situations where steps are as narrow **as 80 cm**.

Thanks to a smart and compact design in fact, it can be easily integrated in small spaces, offering spectators a comfortable seat during sporting events. It is the ideal solution for facilities that require high-end, practical and efficient seats, without sacrificing comfort.

Dimensions: depth with open seat 600 mm, depth with closed seat 400 mm.

Available with seat 600 mm (**FIFA RECOMMENDED**) or 500 mm.

Entirely produced in Italy, a particular care is reserved to the environment, being 87% recyclable and using recycled materials, the LEOSLIM armchair complies with the latest FIFA / UEFA regulations and is FIFA homologated. It is also complying with European norms UNI EN 13200 1-4 and it is tested according European standard UNI EN 12727:2017.

The supporting structure, the side and the seat support are manufactured with injection technology using recycled polyamide loaded with glass fiber, the back support is produced with rotational technology using copolymer polypropylene derived from differentiated waste collection and / or industrial waste, fireproof, fire reaction class 1 and activated in the mass with a substance resistant to UV rays.

The armrests are integrated in the side and covered with expanded polyurethane, armrests with integrated cup holder or with a writing tablet are also available. The side at the end of the row is possibly available in rigid lacquered polyurethane or in ABS produced with injection technology.

The LEOSLIM armchairs are highly customizable: the finishing is available in fabric, velvet, leather or eco-leather; there is a big choice between a wide range of colors, combinations and finishes through embroidered logos or writings; it is also possible to characterize the chair by selecting a different combination of accessories.

The Gold version has an integrated headrest.
